

Results of the Class of 2018 One-Year-Out Survey

Makayla Grays and John Nugent
Office of Institutional Research and Planning
August 2019

Overall, 68 percent of the Class of 2018 graduates for whom we found outcomes information were employed, and 20 percent were enrolled in a degree program—a total of 88 percent. Another 6 percent had a fellowship or an internship, or were working in volunteer and service programs such as AmeriCorps VISTA. Together, then, of the graduates for whom we located information, about 94 percent were employed, enrolled in a graduate or professional degree program, completing a fellowship or internship, or engaged in public service.

- - -

Each summer, the Office of Career and Professional Development (OCPD) and the Office of Institutional Research and Planning collaborate to administer an online “one-year-out” survey which attempts to ascertain the activities, particularly employment and graduate school enrollment, of members of the previous year’s graduating class. On June 18, 2019, an email was sent to the 433 graduates from the Class of 2018 inviting their participation in the One-Year-Out Survey. Of these 433 individuals, 179 (41%) completed the survey. None of the survey items required—i.e., forced—a response, so there are some missing data.

The survey asked graduates to indicate one primary activity and any number of secondary activities they have engaged in since their May 2018 graduation. Results are presented in Table 1.

**Table 1. Self-Reported Primary and Secondary Activities
between May 2018 (Graduation) and June 2019**

Activity	Percent of respondents who said this was their primary activity	Percent of respondents who said this was their primary or a secondary activity
Full-time paid employment ^a	69.3	76.0
Full-time graduate or professional degree program	12.8	15.6
Part-time paid employment ^b	5.0	20.7
Job search	3.9	25.1
Public service or volunteer activity ^c	3.4	8.4
Fellowship ^d	1.7	2.8
Unpaid internship ^e	1.1	5.6
Travel	1.1	19.0
Preparation for graduate school ^f	1.1	16.2
Other	0.6	2.2
Part-time graduate or professional degree program	.0	2.2
Additional non-graduate coursework	.0	7.8

^aIncludes paid internships, Teach for America, and similar positions that pay a salary. ^bIncludes freelancing and similar arrangements. ^cIncludes Peace Corps, AmeriCorps VISTA, and similar activities that are either unpaid or pay only a small living allowance/stipend. ^dIncludes Fulbright and similar positions. ^eUnpaid or paying only a small living allowance/stipend. ^fResearching and applying to programs, studying for entrance exams, etc. Percentages based on 179 respondents.

Most respondents said that their primary activity since graduation was full-time paid employment. Of course, graduates can be engaged in more than one of the activities listed in Table 1; 51 percent of respondents reported at least one additional, secondary activity. The right column of Table 1 displays the percent of survey respondents who reported each activity as *either* primary or secondary. Because each graduate can be represented in more than one activity, the right column does not sum to 100 percent.

As shown in Table 1, **76 percent of survey respondents said they had experienced some period of full-time paid employment since graduating**, which implies that 7 percent of graduates had full-time employment during this period but did not consider it their “primary” activity. One-quarter of respondents were engaged in a job search, although only a small percentage of graduates regarded this as their primary activity. Twenty-five percent of survey respondents were enrolled in some form of education, either a graduate/professional degree program or additional non-graduate coursework. Details of the programs and institutions in which graduates enrolled are presented in Appendices A and B.

Respondents who said their primary activity after graduating was full- or part-time employment, a fellowship, service/volunteer work, or an unpaid internship were asked for details and follow-up questions about their primary position. Questions focused on job sector and the position’s relevance to the respondent’s major(s), perception of how the position relates to his/her career, and how qualified he/she feels for the position. Figure 1 and Table 2 shows overall results for respondents.

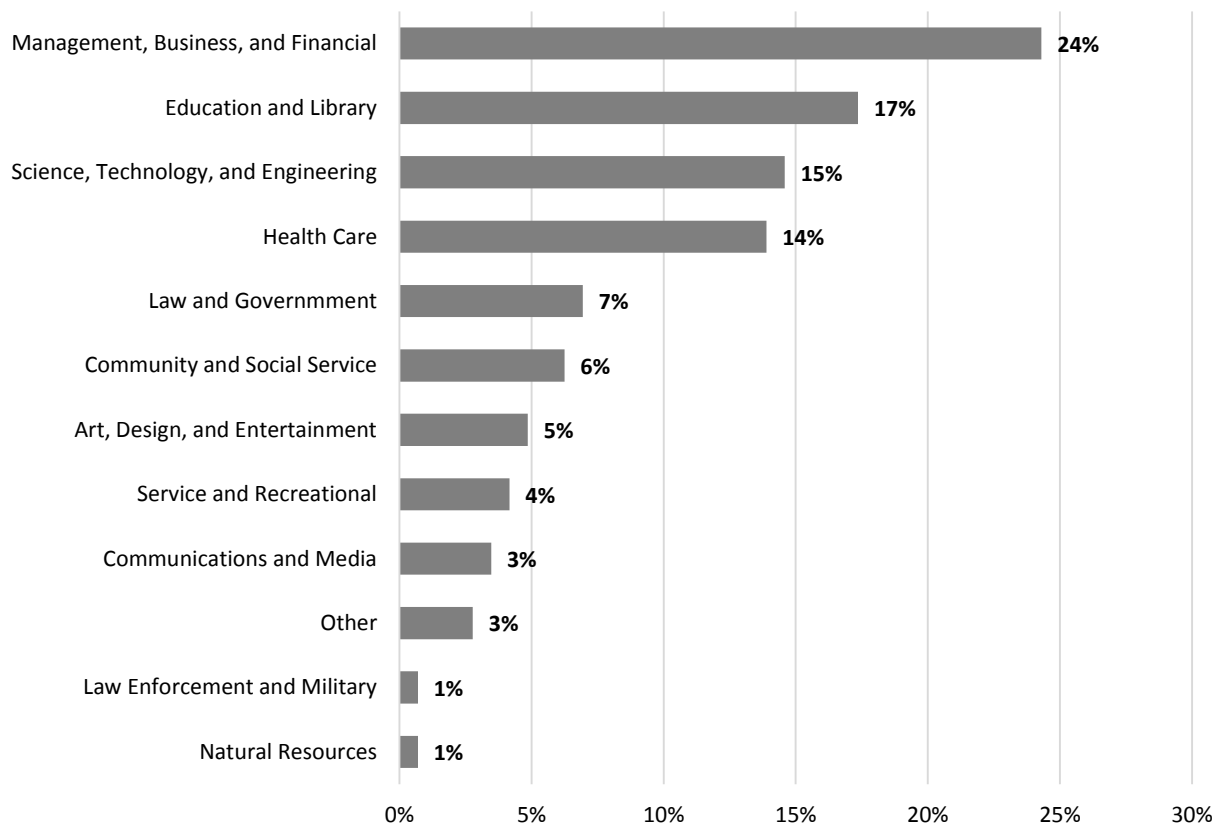

Figure 1. Primary activity job sectors.

The top job sectors for graduates were Management, Business, and Financial; Education and Library; Science, Technology, and Engineering; and Health Care. Most respondents (80%) said that their primary position after graduation was either directly or indirectly related to their college majors. **Most viewed the position either as either a career (27%) or, more commonly, a stepping stone to a career (56%).** Most respondents (95%) said that they were either appropriately qualified or over-qualified for their positions.

Table 2. Perceptions of Primary Position Held after Graduating

Question	Response	Percent of respondents
1. Is/was this position related to your major(s) at Connecticut College?	<i>Yes, directly</i>	36.7
	<i>Yes, indirectly</i>	42.9
	<i>No</i>	18.4
	<i>Unsure/it's too early to tell</i>	2.0
2. Which of the following best describes your view of this position?	<i>A career</i>	26.7
	<i>A stepping stone to a career</i>	55.5
	<i>Just something to get me by for now/at the time</i>	11.6
	<i>Unsure/it's too early to tell</i>	6.2
3. How qualified are/were you for this position?	<i>I have/had more qualifications than required (i.e., overqualified)</i>	19.9
	<i>I have/had about the right amount of qualifications</i>	74.7
	<i>I have/had only some of the qualifications required (i.e., underqualified)</i>	5.5
	<i>Unsure/it's too early to tell</i>	0.0

Note. Most common response shown in boldface. Percentages based on 146-147 respondents.

The survey asked graduates who searched for a job in the past year to report on the various job search approaches they have used. Results are presented in Table 3. The most commonly used approach was networking, which was also rated highest in terms of usefulness.

Table 3. Job Search Approaches

Approach	Percent of job seekers who used this approach	Average rating given by those who used this approach 1-not useful, 2-somewhat useful, 3-very useful
Networking (family, friends, and classmates)	100%	2.44
LinkedIn (General)	95%	2.10
Job aggregator websites (e.g., Indeed.com, SimplyHired, Monster, CareerBuilder)	95%	2.05
Volunteering/interning	76%	2.03
CC Alumni Directory	58%	1.96
LinkedIn (CC Networking Group)	50%	1.95

Note. Percentages based on 41-44 respondents.

To supplement the survey results, we queried the National Student Clearinghouse database to identify graduate school enrollments of the survey nonrespondents. Seventeen graduates who did not complete the One-Year-Out survey were found to be enrolled full-time in graduate programs as of spring 2019. We considered this to be their primary activity. Adding these 17 graduates to the 179 survey respondents meant that we found outcomes information on 45 percent of the class.

Overall, 68 percent of the Class of 2018 graduates *for whom we found outcomes information* were employed, and 20 percent were enrolled in a degree program—a total of 88 percent. Another 6 percent had a fellowship or an internship¹, or were working in volunteer and service programs such as AmeriCorps VISTA. Together, then, of the graduates for whom we located information, ***about 94 percent were employed, enrolled in a graduate or professional degree program, completing a fellowship or internship, or engaged in public service.***

Details of the institutions and degree programs in which Class of 2018 graduates enrolled are presented in Appendix A (sorted by institution) and Appendix B (sorted by major). These tables include individuals enrolled in non-degree coursework or certificate programs, or whose degree-seeking status was unclear. Appendices C and D present details of graduates' employment, fellowships, internships, and volunteer service sorted by employer and major, respectively. For One-Year-Out Survey respondents, details of the primary activity are shown, which may not reflect graduates' *current* positions.

¹ Per the recommendation of the OCPD director, unpaid internships are considered a form of employment and thus are included in the overall outcome figure (94%).
